

## **Directions for 6 door foldable – Evidence for plate movement**

Use the reading “Continents Change Position over Time” to fill out your pre-labeled foldable. You will need to fold the paper to look like the example in class. Hint: start with a hamburger fold. Cut along the dotted lines only. You are to complete the foldable by adding the information that is in bold typeface

Left side Title - Wegner/Evidence for Continental Drift

Flaps left side - Fossils, Climate, Geology

- 1. Describe each piece of evidence on the inside of flap and draw an illustration**

Right side Title - Theory Plate Tectonics/Evidence from the Sea Floor

Flaps right side - Sea floor spreading, age of the sea floor, ocean trenches

- 2. Describe each piece of evidence on the inside of flap and draw an illustration**

On the back of the foldable

Title - Causes of plate movement

- 3. Name all three causes of plate movement and illustrate**

illustrate

3rd fold

describe
